

If an existing street light is not working, please [contact the Borough Clerk's Office](#) and have the following information available:

- The utility pole number which is located about eight (8) feet high on the utility pole and will start with the initials FL followed by a number
- The address or approximate address of the utility pole
- The intersecting cross-streets

Once the information is received in the Borough Clerk's Office, PSE&G will be immediately notified. It should take no more than three (3) business days before the repair is made.

In the alternative, you can complete the downloadable form below and submit it to PSE&G directly.
