The Building Department and the Fire Prevention Bureau announce that, on or about May

1, 2014, they are relocating their offices to 1365 Inwood Terrace (next to the Community Center)

If you are anticipating doing business with either of these offices after May 1, please telephone them directly to confirm their physical location:

- **Building Department: 201-592-3500 x1503**
- **Fire Prevention Bureau: 201-592-3500 x1502**

The Fort Lee Fire Prevention Bureau is staffed by full time employees and is responsible for the enforcement of all state and local fire codes within the Borough of Fort Lee.

The professional and friendly secretarial staff of the Fire Prevention Bureau will assist the public with questions concerning applications for Continuing Certificate of Occupancy, Police and Fire Alarm Registration, Invalid and Tot Finder Programs, and Lock Box applications, as well as scheduling appointments for inspections.

The fire inspector's regular duties consist of investigation of complaints, routine fire inspections, fire lane enforcement, smoke detector/carbon monoxide compliance, and public education. In addition to these duties, all inspectors are trained as medical first responders and certified in the use of defibrillators, trained as fire investigators to determine the origin and cause of fires, explosions, or hazardous material spills. Lastly, the Fire Prevention Bureau responds to all active fire alarms during working hours to relieve the burden from the Fort Lee Volunteer Fire Department. Each of the inspectors held the position as Fire Chief of the Fort Lee Fire Department and provides twenty-five (25) plus years of diversified experience in fire protection and fire prevention discipline.

All of the inspectors' vehicles are equipped with self-contained breathing apparatus (SCBA), personal protective equipment (PPE), medical supplies, oxygen and external automatic defibrillator (EAD), forcible entry tools, and carbon monoxide detectors.
